## Severe Weather History 3712 Galley Rd, Colorado Springs, CO 80909, USA

| Date           | Event Type | Meteorologist Duration | Meteorologist Magnitude | Algorithm Magnitude |
|----------------|------------|------------------------|-------------------------|---------------------|
| June 17, 2025  | Hail       | 6 min                  | 1.25 in                 | --                  |
| June 15, 2025  | Hail       | 5 min                  | 1.7 in                  | 0.75 in             |
| August 5, 2023 | Hail       | --                     | --                      | 0.75 in             |
| July 20, 2023  | Hail       | 6 min                  | 2.5 in                  | 2.25 in             |
| July 7, 2023   | Hail       | 6 min                  | 1.75 in                 | 1.75 in             |
| July 5, 2023   | Hail       | 5 min                  | 1.25 in                 | --                  |
| July 4, 2023   | Hail       | 5 min                  | 1.25 in                 | 1 in                |
| May 26, 2023   | Hail       | 20 min                 | 1 in                    | 1 in                |

## Description

---

- Meteorologist Duration and Meteorologist Magnitude are hand-curated by a team of Meteorologist analyzing the maximum hail or wind speed at a neighborhood-level.
- Algorithm Magnitude is generated by Canopy Weather and is a state-of-the-art forensic weather algorithm that triangulates atmospheric data, internet resources, and ground observations to determine the typical hail size or wind speed for that event and location.
- Meteorologist and Algorithm data may have different values for the same event and location.
- All events are for the specific location in question.
